

Powerful Learning Statement

The mission statement '**To inspire and educate for life**' is promoted through developing key skills: 'Essentials for learning and life':

- English
- Mathematics
- Computing
- Learning and thinking skills
- Personal and emotional skills
- Social skills

Our core purpose is to develop children as powerful learners:

- Powerful learners increasingly make connections to construct meaning. They develop precise language to question, reason and evaluate.
- Powerful learners are actively engaged in their learning. Their learning pathways are relevant to their needs and they increasingly self evaluate their work and drive their own learning forward. Their achievements are recognised and celebrated.
- Powerful learners are increasingly self aware and motivated. They use their 'Keys for Success' strategies to increase their capacity to learn.
- Powerful learners respect others and contribute to the success of our community.
- Powerful learners are effective communicators and problem solvers.
- Powerful learners are inspired, supported and challenged to be both independent and inter-dependent.

Staff, governors and parents work in partnership to support and challenge children to be successful learners, confident individuals and responsible citizens.
