Dear Parents and Carers

We have been informed today that a child in our school has unfortunately tested positive on a LFD test over the weekend. That child wasn't in school today and first showed symptoms on Saturday. The child concerned is awaiting PCR results and I have extended best wishes from the school and hope they stay well.

Parents of that specific class have been informed, therefore if you haven't been informed separately, you know the case is not in your child's class. This letter is just to keep you informed of our communication procedures. There are some useful links and advice here so it may be worth keeping this letter on file.

I know that you may find this concerning, but we are continuing to monitor the situation and are working closely with Public Health England advice. This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

Our school will remain open and your child should continue to attend as normal if they remain well. All students and staff, regardless of year group, should remain vigilant regarding COVID-19. All parents are advised to continue with the routine twice weekly asymptomatic LFD COVID-19 testing of those aged 11 and above in the household.

What to do if your child develops symptoms of coronavirus (COVID-19) or tests positive for COVID-19

If your child develops symptoms of coronavirus (COVID-19), they should get a PCR test and remain at home at least until the result is known. If negative, the child can end self-isolation; if positive, the child should isolate until at least 10 days after their symptoms appeared. Symptoms of coronavirus (COVID-19) are a new, continuous cough, or a high temperature, or a loss of, or change in, their normal sense of taste or smell (anosmia). If the child has a positive test result but do not have [symptoms](#), they should stay at home and self-isolate for 10 days from the date the positive test was taken. This isolation period will be extended if they go on to develop symptoms by counting 10 full days from the day following their symptom onset. Anyone with symptoms will be eligible for a PCR test (the normally available test type) and this can be arranged via [Get a free PCR test to check if you have coronavirus \(COVID-19\) - GOV.UK \(www.gov.uk\)](#) or by calling 119.

Instructions for people who live in the same household as someone with COVID-19 (tested positive or symptomatic awaiting a test result)

Please see the [stay at home guidance](#) with information of what the household should do and who is exempt from isolation as a close contact. Even if you are exempt it is recommended that close contacts get a PCR test if aged 5 and over, and undertake other measures outlined in the guidance such as limiting contact with anyone who is extremely clinically vulnerable and wear a face covering in enclosed spaces while the person in your household with COVID-19 is self-isolating.

If you develop [symptoms](#) at any time, even if these are mild, self-isolate immediately, [arrange to have a COVID-19 PCR test](#) and follow the [guidance for people with COVID-19 symptoms](#).

For most people, coronavirus (COVID-19) will be a mild illness.

If your child does develop symptoms, you can seek advice from the nhs.uk website at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/>. If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

Contacts who are not required to self-isolate from 16 August

From 16 August, you will not be required to self-isolate if you are notified you have had close contact with someone with COVID-19 and any of the following apply:

- you are fully vaccinated
- you are below the age of 18 years 6 months
- you have taken part in or are currently part of an approved COVID-19 vaccine trial
- you are not able to get vaccinated for medical reasons

Fully vaccinated means that you have been vaccinated with an MHRA approved COVID-19 vaccine in the UK, and at least 14 days have passed since you received the recommended doses of that vaccine.

If you are a health or social care worker or student working in health and social care settings who has been identified as a household contact and are exempt from self-isolation, there is [additional guidance available](#) that you should follow to reduce the risk of spread of COVID-19 in these settings.

This means that students who are under the age of 18 years and 6 months or older students who are fully vaccinated can still attend the educational setting if identified as a close contact but are recommended to get a PCR test if 5 years and avoid anyone who is extremely clinically vulnerable for the time you would have isolated and follow additional measures outlined below.

How to stop coronavirus (COVID-19) spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with coronavirus (COVID-19): [guidance on how to stay safe and help prevent the spread](#)

- get vaccinated – everyone aged 16 and over can [book COVID-19 vaccination appointments](#) now
- wash your hands with soap and water or use hand sanitiser regularly throughout the day
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
- meet people outside and avoid crowded areas
- open doors and windows to let in fresh air if meeting people inside
- wear a face covering when it's hard to stay away from other people – particularly indoors or in crowded places
- participate in twice weekly LFD testing following national guidelines (recommended for 11 years and over).

We encourage you to log your results here: <https://www.gov.uk/log-test-site-covid19-results>
